

VELCHANOS

Velchanos offers an SaaS solution to help you prepare convincing and reliable proposals. With the help of our software, what took days for your valued specialists to calculate can now be calculated within minutes.

Within minutes, we calculate the tool costs using your chosen fabrication method.

This simplifies your processes considerably and frees up your engineers.

Velchanos is cost-effective, customer-friendly, and ensures you a strong competitive advantage.

The world before Velchanos

The world after Velchanos

What does Velchanos need, in order to begin?

Velchanos is a "Big Data" solution. Velchanos needs to statistically analyse at least 50 data sets per fabrication method. More data sets are better, considerably more are considerably better.

What do you need, in order to begin?

A standard browser, internet access and a login to Velchanos. You upload your STEP file in the web form and add in any additional parameters – with the push of a button, Velchanos analyses this data and extrapolates the finished calculation.

More questions?

- Are multiple fabrication methods possible?
- Are Chinese tools possible?
- Is co-determination possible in the Beta phase?
- Is an on-premise installation possible?
- Is ERP integration available?

What does Velchanos need, in order to calculate?

The CAD drawing (STEP File), and preferably a 2D drawing of the tool, as well as information from the specifications.

What do you get in return?

- A Software as a Service solution
- Quick** / Calculation in less than 10 minutes!
- Cost-effective** / One calculation per analysis.
- Exact** / Measurable and transparent.
- Secure** / Multi-level security concept.

Yes. As long as the data is not mixed.

Yes. With enough data.

Yes. We welcome your interest.

No. That brings more disadvantages than advantages.

Yes. After a joint project, this is possible.
